

Des petits gestes pour de grands changements!

Household waste is now collected every two weeks at all times, as the City aims to implement solutions to optimize residual materials management and improve the environmental impact of our community.

Our objective

In Sainte-Anne-de-Bellevue, only 43% of residual waste generated is recovered. By 2025, our goal is to have 70% of residual materials recycled.

A collective effort!

To achieve this goal, the City is implementing household waste collection every two weeks and launching an awareness campaign to encourage its citizens to engage in thoughtful sorting!

Sainte-Anne-de-Bellevue is a community that values the environment and sustainability:

- Plastic bags are prohibited within the territory.
- We are a Bird-Friendly and Monarch-Friendly City.
- Urban beekeeping is allowed.
- The eco-friendly event Naturally Sainte-Anne is a success every year.
- The Moving Towards Sustainability Fund has been in place since 2013.

**Let's continue
to take small actions
for big changes together!**
